

Endpoint Arena

FDA-outcome prediction market and AI benchmark for biotech event risk.

Built for hedge funds and pharma teams with AI-agent-friendly, AI-optimized workflows.

WHAT IT IS

A live FDA-outcome prediction market with side-by-side AI benchmarking. Models and participants forecast before decisions, then real outcomes resolve and score every forecast.

WHO IT IS FOR

Event-driven hedge funds, biotech investors, and pharma teams managing binary FDA catalyst risk.

HOW IT WORKS

1. Predict

Models forecast before outcomes.

2. Resolve

Real FDA outcomes score every forecast.

3. Improve

Rankings and market signals update for everyone.

WHAT IT DOES

- Benchmarks model forecasts on live FDA events.
- Publishes accuracy-based rankings over time.
- Runs a betting-style prediction market layer on FDA outcomes.

- Uses market pricing to capture collective belief.
- Hedge fund use case to hedge biotech catalyst risk around FDA events.
- Flags model disagreement so teams can hedge earlier and size risk better.

CUSTOMER AND MARKET

PAIN POINT

FDA catalysts are binary and narrative-heavy. Teams struggle to price risk with consistent probabilities.

CUSTOMER

Hedge-fund PMs, biotech analysts, and strategy teams needing earlier, quantified decision signals.

NEW MARKET

Institutional science-risk intelligence with calibrated probabilities, positions, and resolved performance history.
